Usag Matrix.
The solution for all solutions.
Whatever your model, Matrix fits the bill.

Usag presents an intelligent solution that gives you every solution at your fingertips: introducing Matrix, the system that allows you to have all your tools perfectly organized when you’re on the move, and to locate them instantly for use once you reach the job. A combination of removable tool boxes or fixed drawers can be fitted to suit a whole range of needs.

The project combines technology and acute awareness of the priorities of workers: Matrix is a truly modular solution that can be adapted and combined to offer specific solutions to meet every professional requirement.
Time saving, energy saving, improved working efficiency. In other words: everything on board.

Matrix is a highly versatile system: today, indeed, every model of commercial vehicle on the market can be fitted out with Matrix. The modular system is designed to allow personalized fitting out, with rational use of available space ensuring the optimum solution for every possible combination. Along with safety guaranteed by Usag. Matrix gives added certainty when travelling to any job: an ingenious mobile workshop that puts everything in order for you.

Ample storage capacity: modules with removable tool boxes or fixed drawers. Organisation and convenience now go hand in hand.
So ingenious.

Matrix is truly an ingenious system: work is suddenly simpler and less strenuous. The outfitted vehicle becomes one big workshop, with everything within easy reach. Just open the tool boxes and pick what you need. And if you happen to have just one free hand, don’t worry: Usag has designed a practical, ergonomic handle that allows you to open the drawers even with just one hand.

Tool boxes too can be opened with the greatest of ease: the clip fasteners are designed to allow access to each tool box without pulling out the entire module. All you have to do is choose the right tool at the right time: when it comes to that, not even Matrix can take the place of a real professional.

Superb modularity.

Central locking system.

Ergonomic handles.

Extractable case

Open and choose

An excellent slide system assures the total opening of the drawer and blocks it when completely open to avoid damages when the vehicle is not completely on the flat.

Ergonomic handles: drawers can be opened with one hand.

Extractable cylinder for lock replacement.
Possibility to have a single key for all your drawer chests.
Everything on board.

Ready to follow you anywhere:
the tool boxes can be removed with
the greatest of ease, without the
need to remove any other parts.

Take everything with you.

The other purpose for
which Matrix was designed
also makes it ingenious.
Because when you need to,
you can take everything with
you. Each tool box can be
removed from its module with
the greatest of ease, without
opening and closing anything.

Simply take it with you
wherever you need it,
open it effortlessly up,
select your tools, do the job,
return to your vehicle
and slide the tool box back
into the empty space.

At long last, a highly
ergonomic system designed
to make everything simpler
and better organized,
so everything runs smoothly.
With Matrix, every job
is a well done job.

So ingenious.
If Matrix is the solution you’ve been looking for to organize your work in the most rational way possible, our doors are open. We can plan every type of solution, specially studied to fit out any commercial vehicle. We’ll listen carefully to your needs and build a detailed project around them.
