

Water filter vacuum cleaner DS 5600

Art.Nr.: 1.195-130 EAN Code: 4039784281899

The efficient **4 step – filter system** of the new DS 5600 offers a constant throughput without blockage and with no filter bags:

- 1) Filtering of coarse dirt in water bath: the dusty air is led through the water filter. In its eddy nearly all dirt particles are safely bound.
- 2) Intermediate filtering of airborne particles: here, the remaining tiny airborne particles are filtered out.
- 3) High performance HEPA 12-filter: collects even particles of a size of down to 0,3 µm. Therefore, this vacuum cleaner is a safe protection against mites, spores and fungi.
- 4) Exhaust air filter: the exhaust air is purified up to 99,99 % and thus is decidedly cleaner than the air in the room. Especially allergic persons benefit from this fact, but also families with small children and pets.

**New optimised
Floor tool
No filter bags
necessary!**

Accessory storage

HEPA Plus filter

Technical data:

- connected load: 1.400 W
- air flow rate: 55 l/s
- vacuum: 210 mbar
- water filter: 2 l
- working radius: 7,5m

Standard equipment:

- 2m suction hose with softgrip handle
- stainless steel telescopic suction pipe
- switchable dry suction nozzle
- crevice nozzle and upholstery nozzle
- motor protection filter
- HEPA plus filter
- defoamer „Foam Stop“
- leaflet for allergic persons
